Karachi, Pakistan | (+92) 342-2364158 | fawadnadeem54@gmail.com | [LinkedIn](#) | [Website](#)

Professional Summary

Data Engineer specializing in Azure and modern data stack technologies with nearly 6 years of experience across data engineering and analytics, building scalable ETL pipelines, Delta Lake architectures, production data platforms, and automated reporting workloads. Strong background in SQL, Databricks, Python, PySpark, Azure Data Factory, and Azure Data Explorer (Kusto). Recently completed a contract engagement embedded with Microsoft's CE&AI organization and now seeking a full-time, long-term Data Engineering role in Lahore and Islamabad to contribute to stable, evolving data platforms.

Technical Skills

Core Stack: Azure Data Factory, Databricks, Delta Lake, Azure Data Lake Gen2, Synapse, Fabric, Azure Data Explorer (Kusto)

Programming & Query Languages: Python, SQL, PySpark, KQL

ETL & Orchestration: ADF, Databricks Jobs, SSIS, dbt, Azure Logic Apps, Power Automate

Databases & Warehousing: SQL Server, Azure SQL, Postgres, Snowflake, BigQuery

Data Visualization: Power BI, Looker Studio, Tableau

Other Tools: Fabric Lakehouse, Terraform, Microsoft AI Foundry, Git, Azure DevOps, Airflow, Kafka

Professional Experience

Senior Data Engineer — HYFATech (FTE, embedded with Microsoft CE&AI)

Remote | Feb 2026 – Jul 2026

- Supported enterprise-scale data infrastructure powering operational reporting across 255 services and 11 Service Groups within Microsoft's Commercial Engineering & AI (CE&AI) organization.
- Designed and maintained KQL functions and ADX pipelines driving the S360 (Service 360) reporting platform, including SLA Adherence and Active Action Items reports consumed by senior stakeholders across the CE&AI org.
- Led scope expansion of the GetOrgServiceIds function, extending coverage from BIC CXP to the full CE&AI organization.
- Provisioned and configured a production Azure Data Explorer (Kusto) cluster and migrated three production databases with full schema deployment and row count validation.
- Implemented a managed identity authentication pattern (Azure AD UMI) enabling secure, credential free Azure Data Factory access to the production Kusto cluster.
- Diagnosed data integrity issues caused by append based ingestion and redesigned the load approach to guarantee accurate, idempotent loads across 24+ production tables.
- Identified and documented critical data quality issues, including ghost record surfacing and blank ProgramId root causes, delivering actionable remediation recommendations.
- Completed end to end threat model documentation for the CEA Reporting platform, covering 23 threat model review comments and 21 formal findings across Azure Data Factory, Azure Data Explorer, Power BI, and Azure Key Vault.
- Authored architecture documentation, KQL runbooks, and lessons learned used for project handover and audit purposes.

Senior Data Engineer — Elevare Digital

Remote (Austin, Texas, US) | June 2025 – Jan 2026

- Led end to end data engineering initiatives for multiple international clients including Logical CRM, Towingwiz, Verified, Alan E-com, and The Restaurant Group (UK) across logistics, e-commerce, and hospitality sectors.
- Designed and built automated data pipelines using Azure Data Factory, Databricks, and Python to integrate and process large scale data from multiple operational systems.
- Architected centralized data warehouses supporting near real time reporting and analytics, reducing manual data preparation time by up to 80%.
- Implemented ETL/ELT frameworks with incremental loading, data quality checks, and automated monitoring, improving pipeline reliability and reducing failed load incidents.
- Developed and deployed Power BI dashboards for executive reporting, enabling leadership teams to make faster, data driven decisions.
- Managed multiple concurrent client projects while keeping infrastructure cost efficient and scalable.

Senior Data Engineer — Xavor Corporation

Remote, Pakistan | Sep 2024 – May 2025

- Automated end to end survey analytics pipelines for BOSA Properties on AWS, eliminating manual survey processing and improving reporting accuracy.
- Integrated Azure SQL with Power BI to deliver interactive dashboards providing real time insight into sales trends and inventory turnover.
- Built automated reporting workflows using Databricks and Power BI for 360Training, replacing manual report assembly.
- Orchestrated transformation logic across cloud systems using GCP Dataflow and Cloud Scheduler.

Senior Data Engineer — International Office Products

Karachi, Pakistan (On-site) | Mar 2023 – Aug 2024

- Designed and implemented an enterprise data warehouse on Azure integrating multiple ERP systems, ensuring data integrity and accessibility across the organization.
- Led the SunStar ETL project, integrating data from multiple ERPs into a consolidated model for cross system analysis.
- Built ETL/ELT pipelines using Databricks and SSIS for ingestion from APIs and flat files, with complex T-SQL stored procedures handling cleansing, deduplication, and validation.
- Produced detailed reporting on hotel revenue, occupancy, and budget, directly supporting strategic decision making.
- Engineered HR productivity reports that streamlined payroll and working hours management.
- Created proof of concept dashboards for Swansea University and Saudi startup Awaed, supporting new business development.
- Developed a Customer Sentiment Analytics dashboard categorizing customer feedback to improve service quality.

Data Analytics Engineer — SmartBenefits (Smart Choice)

Karachi, Pakistan | Feb 2022 – Feb 2023

- Designed ETL/ELT processes ingesting data from disparate sources into a centralized data warehouse for Pakistan's leading insurance marketplace.
- Developed a comprehensive sales department dashboard in Looker Studio, automating commission management and agent performance tracking.
- Reduced complaint resolution time and improved response rates through purpose built Customer Service dashboards.
- Built real time dashboards for corporate insurance and OPD customers monitoring quota usage and claims, strengthening fraud detection capabilities.
- Created a customer demographics dashboard that drove targeted promotional campaigns and increased customer engagement.

Data Analyst — Charity Right Pakistan

Karachi, Pakistan | Sep 2020 – Dec 2021

- Cleaned and processed program datasets to remove irregularities, enabling reliable measurement of program impact.
- Analyzed program outcome data to quantify impact and identify areas for improvement across education initiatives.
- Introduced a structured mentorship concept for the mental, emotional, and personal development of 8th grade students, designing surveys across professionals and students; analysis showed 79% of mentored students reported positive professional and personal change.

Education

Bachelor of Science in Software Engineering

University of Karachi (UoK) | Graduated 2021

Certifications

Data Engineering: Microsoft Certified: Fabric Data Engineer (DP-700) • Azure Data Engineer Associate (DP-203) • Fabric Analytics Engineer (DP-600) • Coursera: Data Engineering in AWS

Data Analysis: Microsoft Certified: Power BI Data Analyst Associate (PL-300) • Google Data Analytics Certificate

AI and Machine Learning: DeepLearning.AI: AI for Good • Coursera: IBM Data Science Professional • Hugging Face: AI Agents

Volunteer Work

Rahbar Program Coordinator — The Citizen Foundation

Sep 2024 – Feb 2025

- Trained and supported 20+ mentors guiding students academically and personally.

Rahbar Program Mentor — The Citizen Foundation

Jan 2021 – Aug 2024

- Mentored 8th grade students in academic development and life skills.
